Homemade treatment for parvo.

Suggested by a dog owners Vet - **Flagyl suspension** (to aid and protect the intestinal stomach wall) twice a day with **Synulox antibiotics (50mg tablets for animal use)**.

We also gave **Stemetil suppositories (or clopamon)** for nausea.

Give water with electrolytes and add **Protexin** soluble or alternative it has all that you need to speed up recovery.

This treatment was given to me by our Vet.

Most vets use **Clopamon injections for nausea** and **Synulox antibiotics when treating parvo**.

We keep these just as a precaution.

You never know who brings what to your yard....!
