Colloidal silver for dogs.

Inexpensive natural & holistic, alternative all-around cure to harsh drugs (but not a replacement for veterinary care).

Colloidal Silver is very easy to use and is completely non-toxic, and safe for dogs.

Many “healers” over the ages have taken silver’s conductive ability and translated that into the belief that it can conduct the body’s energy and help heal the individual.

This is besides the actual physical antibiotic nature of silver.

It goes so much deeper than that on a metaphysical level.

The healers believe that it can channel positive energy into the patient.

Product concentration.

The smaller the particle size of the Colloidal Silver is, the greater it’s surface area and the higher its efficiency - (nano particles) – then the more easily they penetrate into the body’s tissues and the better they are assimilated and utilized.

Know this! ... A concentration of 20 ppm is still much more effective than a concentrations of 500 ppm!

Storage.

Colloidal silver is better stored in high-grade medical plastic rather than glass as it tends to plate out in glass containers, making it less potent after long storage periods.

Looking at it as a health supplement.

Preventative treatment ...

Whenever exposure to illness / diseased

Natural resistance booster before diseases or before core vaccinations or before and during puppy care.

Immunity booster – daily in food and water –

Holistic dog care immune system booster –

Keeping low-lying pathogens out of the system.

Respiratory issues – bronchitis, pneumonia - using as nebulizer.

Infections

Bacterial infections -

Fungi infections -

Viruses infection (even parvo) -

Yeast infection -

Function.

Colloidal Silver surrounding the pathogen and suffocates the undesirable microbes killing its ability to replicate without harming the living tissue of the dog.

Colloidal Silver fight more than 650 pathogens.

Antimicrobial.

Antibiotic.

Skin.

Topically spray on relief -

Skin infections -

Hot spots -

Cuts -

Bites -

Wounds -

Burns -

Helps to repair tissue damage and soothes the skin -

Ring worms.

Ear.

Infections -

Chronic ear infections -

Yeast bacteria -

Remove goop and odor from smelly ears.

Urinary tract infections (UTI).

Eyes.

Eye infections -

Pink eye -

Eye allergies -

Eye inflammation -

Tear-staining -

Since it does not burn or sting, it can be put directly into the eyes.

Teeth gums and mouth.

Removes plaque with regular use.

Thyroid issues.

Digestive tract.

Cramps and pain -

Candida.

Toe nail.

Pad injury –

Fungus.

Parasites elimination.

Dosage.

Colloidal Silver is not dose specific, which means it can be given in larger doses for more difficult health issues without any harmful side effects.

Note! ... It has been proven impossible for single-celled organisms to actually mutate into silver resistant forms.

As happens with allopathic antibiotics and antivirals - meaning that no tolerance to colloidal silver ever develops.

Colloidal silver also cannot interact or interfere with other medicine being taken, and it has no side effects.

Colloidal Silver does not create any type of toxic build up inside the body, nor does it react with anything other than a pathogen's oxygen metabolism.

Suggested applications.

For maintenance: - Once daily

For immune-building: 2-3 times daily.

For treating a specific health condition: up to 5 times daily.

Short term acute support: up to 7 times daily.

Some dosages.

Below are some dosage guidelines for amounts to give for treating any kind of health condition;

However as stated above ... colloidal silver is not dose specific.

When your dog is dealing with an acute condition they can have much higher doses of the silver for short term help in curing something specific, with no ill effects.

1.5 - 5kg - 1 tsp - or 5 ml two to three times a day for 2 weeks or more

5 - 15kg - 1 1/3 tsp

15 - 25kg - 2 tsp or 10 ml two to three times a day for 2 weeks or more

25 - 40kg - 2 1/2 tsp.
